SUMMARY

Research Interests: World models and embodied intelligence.

Highlights: End-to-end, hands-on experience building a multi-view video world model on top of *lingbot-world* (a 14B, DiT-based, action-conditioned video diffusion model) on 16×H200 GPUs — owning the data-and-conditioning pipeline and the adapter/LoRA model-adaptation training within a collaborative research team.

EDUCATION

SOUTH CHINA UNIVERSITY OF TECHNOLOGY

Bachelor of Engineering in Mechatronics Engineering; GPA: 3.90/4.00

English Proficiency: IELTS 7.5

Guangzhou, China

Sep 2024 | Jun 2028 (Expected)

RESEARCH EXPERIENCE

PEKING UNIVERSITY

Research Intern, Supervisor: Prof. [Hao Tang](#)

Beijing, China

Feb 2026 | Present

- **Research Topic:** Multi-view first-person video world models — building on *lingbot-world* (a 14B, DiT-based, action-conditioned video diffusion model) with an explicit *Map Memory* spatial condition to generate cross-view-consistent Counter-Strike gameplay.
- **Data pipeline:** Built and scaled the end-to-end data pipeline that transforms raw gameplay recordings into the model's *Map Memory* conditioning signals.
- **Model training:** Implemented and trained the model-adaptation stack — a residual conditioning adapter that injects the *Map Memory* signal into the DiT backbone, together with LoRA fine-tuning — realizing an explicitly map-grounded approach to multi-view-consistent world modeling.
- **Literature & direction:** Surveyed multi-view generation approaches (MultiGen, Multiworld, Gamma-world, MIRA) to inform the project's technical direction.

TECHNICAL SKILLS

Programming: Python, PyTorch

Video / World Models: DiT-based action-conditioned video diffusion, LoRA fine-tuning, *lingbot-world* model family

Infrastructure: Multi-GPU server operation (16×H200), Linux, SSH, tmux, Git, HuggingFace

AI-Assisted Development: Claude Code / Codex for accelerating prototyping

HONORS AND AWARDS

National Scholarship for Undergraduates

Awarded to top undergraduate students nationwide by the Ministry of Education of China; 10,000 CNY

Guangzhou, China

Sep 2025
